AlphaVAT Version 4.5.3 Release Notes

This release contains essential fixes for high priority bugs, performance improvements, a warning for unapplied tags, and continues the development of the annual adjustment feature. Please see below for further details on the key changes:

Performance

We have made performance improvements to the following feature:

- Upload files – Tagging

'Files missing?' warning

Currently, we display a warning whereby the user has not applied tags to all uploaded files. However, if the user has forgotten to upload a file and therefore has unapplied tags, no warning was displayed. As an extension to the above enhancement, a warning will now be displayed.
